templates at the end of this section for you to create your own shapes for your child to reflect, or, even better, for your child to create their own symmetric patterns! Using these sheets will help your child to: learn to reflect a shape in a vertical or horizontal mirror line; learn to reflect a shape in both a vertical and horizontal mirror line; Here you will find a range of line symmetry activity sheets with one or two mirror lines. The sheets in this section are similar to those on this page, but are more complicated and at a harder level. Harder Symmetry Activities Take a look at some more of our worksheets similar to these. Here you will find a range of symmetry worksheets reflecting blocks instead of lines. These sheets are at an easier level than the ones on this page. Symmetry Worksheets - Block Symmetry Looking for some geometry worksheets to get children thinking and reasoning about 2d shapes? The shapes on this page are all about children really understanding what 2d shapes are all about, and using their reasoning skills to justify their thinking. Using these sheets will help your child to: know the properties of a range of 2d shapes; recognise that some shapes can also be described as being other shapes; e.g. a square is also a rhombus; recognise and understand right angles, parallel lines, lines of symmetry; develop their geometric reasoning skills. Explore 2d Shapes Worksheets Here is our collection of printable coordinate plane grids and coordinate worksheets. Using these fun coordinate sheets is a great way to learn math in an enjoyable way. Using these sheets will help your child to: plot and write coordinates. How to Print or Save these sheets Need help with printing or saving? We have plenty of worksheets on this page to help you practice the skills of multiplying 2-digit numbers by 1 or 2 digits. We have split the worksheets on this page into two sections: 2-digit x 1-digit multiplication (3rd grade) 2-digit x 2-digit multiplication (4th grade) Each section ends with some trickier challenge sheets for more able students. Within each section, the sheets are carefully graded with the easiest sheets first. These sheets are aimed at 3rd graders. Sheets 1 to 4 consists of 15 problems; sheets 5 and 6 consist of 20 problems. Sheets 1 and 2 involve multiplying 2-digit numbers by 2, 3, 4 or 5. Sheets 3 to 6 involve multiplying a 2-digit number by single digit numbers and finding increasing trickier products. These 2-digit multiplication worksheets have been designed for more able students who need that extra challenge! These sheets are aimed at 4th graders. Sheet 1 involves 2-digit by 2-digit multiplication with smaller numbers and answers up to 1000. Sheets 2 to 4 have harder 2-digit numbers to multiply and answers that are generally larger than 1000. These 2-digit multiplication worksheets have been designed for more able students who need that extra challenge! We have more 2-digit multiplication worksheets, including 2-digit x 3-digit multiplication problems on this page.
